

# HAMMER MILLS ENGINEERED FOR REAL WORK.

## Built for the Long Haul

AR235 wear plates, heat-treated hammers, and a muscle-bound frame deliver unmatched longevity, even in high-torque, abrasive environments.

## Precision You Can Count On

With adjustable hammer configurations and interchangeable screens (1/64" to 2"), you control particle size and maximize throughput with consistency.

## Safer By Design

From reinforced guards to easy inspection points, every mill is engineered with operator safety in mind — keeping your crew protected and production smooth.

## Power up your plant now.
